

Thermal Core[®] Pack Heater

Efficient Moist Heat Therapy

- ➔ Constructed of high quality 304 stainless steel
- ➔ Seamless rounded corners for quick and effective cleaning
- ➔ Insulated double-wall design for maximum efficiency
- ➔ Sealed heating element
- ➔ Unique removable lid doubles as drip tray

High Quality Construction

The Thermal Core Pack Heater is constructed from heavy gauge 304 stainless steel, making it more durable, efficient, and resistant to corrosion than other thermal pack heaters. The seamless rounded corners of the interior tank and innovative heat element design minimize bacterial growth and make cleaning quick and easy. Removable lid can conveniently be used as a work station or drip tray, and wire rack can be easily removed for cleaning.

Designed to maintain packs at 175° Fahrenheit, the insulated double wall construction effectively retains heat and

ensures efficiency. The Thermal Core Heater is proudly made in the USA with a 3 year satisfaction guarantee.

Large Capacity

The Thermal Core Pack Heater is large enough to accommodate any size thermal pack. Six Thermal Core Packs – four standard and two cervical – are included with purchase of the Thermal Core Heater.

Effective Heat Therapy

Thermal Core Packs deliver deep penetrating moist heat therapy to relax sore muscles prior to professional treatment. The organic interior absorbs moisture and retains heat more effectively than conventional heat packs.

Ease and Convenience

Thermal Core Packs include four tabs to allow professionals to easily handle heated packs. The color coded tabs also provide a convenient visual indicator for pack rotation, ensuring that packs are fully heated prior to use.

Thermal Core Pack Covers are also available in a variety of sizes to compli-

ment Thermal Core Packs. The insulated soft terry cloth cover ensures patient safety and maximum heat retention.
